

The Connected Fueling network made by PACE continues to grow

Diversity for digital payments – team energie cooperates with PACE and sets standards in the German service station market

Karlsruhe, March 24th 2021

team energie is continuing its digitization drive. As the next logical step into the mobile future, the first team gas stations are now available on PACE's Connected Fueling platform. Drivers with the free PACE Drive app can now conveniently pay for their fuel directly at the pump.

Images in the digital press kit

Mobile, contactless payment is gaining ground in all areas. When it comes to refueling, it offers customers particular advantages: Paying via smartphone directly at the pump eliminates the need to go to the cash register and wear a mask when paying. Once payment has been completed, the receipt is automatically sent to the customer's device by email and app, so that all expenses are always in view and nothing can get lost.

"Thanks to the cooperation with PACE, our customers now have an even more extensive selection for mobile payments, which is one of the largest on the German market," reports team energie Managing Director Volker Behn. Service stations also benefit from the innovation. "Fast and contactless payment via app increases frequency and reduces waiting times both at the pump and at the checkout, and above all offers customers a smart and digitally sophisticated solution," explains Volker Behn.

All drivers can use the function free of charge and without further obligations. The PACE Drive app for iOS and Android is available for free download in the app stores. Initially, mobile payment will be possible with PayPal at team energie. In the future, other payment methods such as credit card, Apple Pay and Google Pay will follow.

About team energie

team energie GmbH & Co. KG, with 32 sales locations in energy trading and a dense network of service stations in northern Germany, is valued as a reliable partner in the energy sector. The business field ranges from the classic distribution of lubricants and heating oil, to trading in eco-electricity and eco-gas. Thanks to its know-how and many years of experience, customers always enjoy the best service and highest quality.

About Connected Fueling – connectedfueling.com

The open Connected Fueling platform enables mobile payment directly at the pump through a uniform, cost-saving connection of all partners to the cloud system of connectedfueling.com. The independent platform is open to all petroleum companies and POS system providers. In addition, connectedfueling.com offers flexible interfaces and easy-to-integrate SDKs to car manufacturers and app providers to integrate the mobile payment function into their systems. For more information, please visit www.connectedfueling.com.

About PACE

PACE Telematics, based in Karlsruhe, Germany, is one of the technologically leading providers in the field of Connected Car Services and automotive cloud platforms. In addition to the Connected Fueling marketplace, PACE operates a manufacturer-independent, cloud-based automotive Big Data and IoT platform. With its technology, the Karlsruhe-based startup offers Connected Car solutions for B2B and private customers. For end customers, the Connected Fueling technology can be used with the free PACE Drive app. For more information, visit drive.pace.car.
