

Fueling app PACE Drive introduces popular payment method Google Pay

PACE continues to expand its industry-leading range of payment methods for mobile payments at the pump.

With Google Pay, PACE Drive expands its payment spectrum and offers all users the ideal payment option

Karlsruhe, Germany, 18. July 2023 – According to current studies, Android smartphones are among the top sellers of cell phones worldwide with around 76%, which also increases the demand for payment options via Google Pay ([Statista, 2023](#)). Due to the large market share, the relevance of Google Pay, Google's solution for contactless payments, is also increasing at the same time. PACE has also recognized this trend and is responding to the needs of its users.

Easy setup, simple and intuitive payment process

In the PACE Drive app, it is now possible to pay easily, quickly, and securely at the pump using Google Pay. Google Pay rounds off the existing range of payment methods (PayPal, credit card, giropay, and fuel cards), so that every user can use his or her preferred payment option.

If you have already set up mobile payment with Google Pay on your smartphone, you can also use it to pay at the pump in the PACE Drive app without any additional setup:

1. Select the fuel station in your app.
2. Enter the number of the fuel pump.
3. Fill up like usual.
4. Pay with Google Pay and continue your trip!

You can also say goodbye to the collection of fuel receipts in the glove compartment: The receipt is sent digitally by email directly after the refueling process, and an archive with all receipts can be accessed in the app at any time.

Google Pay can now be used at a majority of the more than 5,900 gas stations connected to the Connected Fueling platform; the app is already available in 14 countries across Europe.

About Connected Fueling

The open Connected Fueling platform enables mobile payment directly at the pump through a uniform, cost-saving connection of all partners to the Connected Fueling cloud system. The neutral platform is open to all petroleum companies, fuel card operators and POS system providers. In addition, the platform offers automotive manufacturers and app providers flexible interfaces and easy-to-integrate SDKs to integrate the mobile payment function into their systems. Find more information at www.connectedfueling.com.

About PACE

PACE Telematics, based in Karlsruhe, Germany, is one of the leading technology providers in the field of Connected Car Services and Automotive Cloud Platforms. In addition to the Connected Fueling marketplace, PACE operates a manufacturer-independent, cloud-based automotive Big Data and IoT platform. With its technology, the Karlsruhe-based startup offers Connected Car solutions for B2B and private customers. For end customers, the Connected Fueling technology can be used with the free PACE Drive app. Find more information at www.pace.car/drive.
