

The Roadrunner Card acceptance network within the PACE Drive App is expanding throughout Germany

Karlsruhe/Gevelsberg, 28.02.2024 – Since spring 2022, the fuel card operator Roadrunner and PACE Telematics have been working successfully in the field of fuel card digitization. The Roadrunner fuel card is integrated into the PACE Drive App, which is based on Europe’s leading and independent platform Connected Fueling. Currently, the Roadrunner Fuel and Service Card acceptance network spans approximately 1,700 stations across Germany. Now, more and more participants and acceptance partners in this network like Q1, Willer, Mönneke, among others, are activating the Roadrunner card within the PACE Drive App.

“With PACE, we have an innovative partner at our side who supports us in driving forward our digitalization processes in the field of digital payments and in keeping our finger on the pulse of the times,” explains Ingo Meyer, Managing Director of Roadrunner Service GmbH. *“We are delighted that more and more acceptance partners are recognizing the added value of mobile payment and see it as a secure, flexible and convenient alternative to conventional payment methods for our customers and that they opt to join us on this journey.”*

Philip Blatter, Managing Director and Founder of PACE Telematics GmbH, adds: *“The growing activation of the Roadrunner Card in the PACE Drive App signifies another crucial step in our mission to simplify digital payments. Through our strong strategic partnership with Roadrunner, we are setting new benchmarks in the mobility industry and are promoting a seamless digital refueling experience together.”*

About PACE Telematics & Connected Fueling

The open Connected Fueling platform, operated by PACE Telematics (Karlsruhe, Germany), enables seamless mobile payment directly at the fuel pump through a uniform, cost-saving integration of all

partners with the Connected Fueling cloud system. The independent platform is open to all petroleum companies, service station operators, fuel card issuers and POS system providers. Additionally, the platform offers automobile manufacturers and app developers flexible interfaces and easily integratable Software Development Kits (SDKs) to incorporate the mobile payment functionality into their systems.
